April 1, 2021

Dear Reavis High School Families and Staff:

There will be some renovation work in progress during spring break in April of 2021 at Reavis High School that will include the removal of asbestos containing thermal system insulation.

The asbestos abatement contractor is scheduled to begin with preparation work Monday, April 5, 2021, and will continue through Friday, April 9, 2021. Asbestos abatement work will be performed outside of normal school hours.

The section of the school undergoing asbestos abatement will be clearly identified and no access will be allowed. Strict work procedures, cleaning and air quality standards will be followed at all times. All abated areas must pass air quality testing procedures before those areas are to be reoccupied.

The administration is working closely with our architects and contractors to create the least disruptive situation possible. The safety of all students and staff is an equally high priority at Reavis High School as we go through this renovation. If you have any questions concerning the renovation and new construction project, please feel free to contact me at school.

Sincerely,

Eric

Eric Novak  
Chief School Business Official
