May 17, 2021

Dear Reavis High School Families and Staff:

There will be some renovation work in progress during May-June 2021 at Reavis High School that will include the removal of asbestos containing thermal system insulation in the corridor of the 1957 addition.

The asbestos abatement contractor is scheduled to begin with preparation work on Wednesday June 2, 2021 and will continue through Monday June 14, 2021. Asbestos abatement work will be performed after 3:30 pm on Monday – Friday and 7:00am – 3:30pm on Saturday as required.

The section of the school undergoing asbestos abatement will be clearly identified and no access will be allowed. Strict work procedures, cleaning and air quality standards will be followed at all times. All abated areas must pass air quality testing procedures before those areas are to be reoccupied.

The administration is working closely with our architects and contractors to create the least disruptive situation possible. The safety of all students and staff is an equally high priority at Reavis High School as we go through this renovation. If you have any questions concerning the renovation and new construction project, please feel free to contact me at school.

Sincerely,

Eric Novak
