September 19, 2012

Dear Reavis High School Families and Staff,

There will be some renovation projects in progress this fall at Reavis High School that will include the removal of asbestos containing flooring.

The asbestos abatement contractor is scheduled to begin with preparation work Friday, September 28, 2012 and will continue through Wednesday, October 10, 2012. Asbestos abatement work will be performed after 4:00 p.m. on school days.

The third floor area of the school affected by this project will be closed off and isolated during all asbestos abatement work. The sections of the school undergoing asbestos abatement will be clearly identified and no access will be allowed. Strict work procedures, cleaning and air quality standards will be followed at all times. All abated areas must pass air quality testing procedures before those areas are to be reoccupied.

The Administration is working closely with our architects and contractors to create the least disruptive situation possible. The safety of all children and staff is an equally high priority at Reavis High School as we go through this renovation. If you have any questions concerning the renovation and new construction project, please feel free to contact me at school.

Sincerely,

Timothy J. Smith
Assistant Superintendent for Facilities and Operations
